

Chinese aerosol market takes a leap

Strong growth continues with 11.7% two-year jump...

The future remains bright for the Chinese aerosol market, with trends suggesting continued, stable long-term growth, according to the Aerosol Committee of China Packaging Federation. Overall aerosol product output in China totaled 1.91 billion units in 2015, an 11.7% jump over 2013's 1.71 billion.

All categories showed steady growth, with the exception of Insect Control, which dipped 7.9% in 2015 to 350 million filled.

New to the Chinese survey in 2015 is the aerosol Food category, which charted at a modest 10 million. According to the Aerosol Committee of China Packaging Federation, consumption of aerosol foods in China is greater than production, indicating an area of potential future growth. **SPRAY**

Note: The China Packaging Federation Aerosol Committee reports production figures every other year.

2015 Aerosol production in China in millions of units

Categories	2013	2015	% change
Food	n/a	10	n/a
