**New and Innovative Squeeze Foamer**

The latest innovative foamer on the market!
Unlike the typical foaming package that requires a pump, this patented technology contains a snap-on flip top closure. You will get perfect, creamy foam with just one controlled squeeze. The impressive bottle-closure combination allows for ease of use, more directional dispensing and frees the user’s hands during application. The reduced packaging size optimizes your shelf space and our in-house decorating facility will provide your brand with a fresh new look. It’s an ideal package for numerous markets and applications such as hair, sun, facial & body care, baby care and pet care.

**Aluminum Aerosol Cans from Montebello**

Montebello provides the perfect package to hold and enhance your trusted brand. Offering aerosol cans in 25, 32, 35, 38, 45, 53, 59, and 66mm diameters, we have strategically located manufacturing locations in both the U.S. and Canada. Our decorating capabilities are highlighted by our 9-color printing units, proprietary dry dot screening techniques, and 3D proofing, all of which allow us to print designs that push the limits of dry offset printing. Sophisticated vision inspection systems and statistical process control for all of our manufacturing operations ensure print consistency and quality of every can.

**Aerosol Can Crusher with Automatic Feed and Recycling Option from Beacon**

Beacon Engineering offers an affordable can crusher with automatic feeding AND a new labor saving feature that allows for preloading the feed table with up to 16 cases of cans. This compact machine is equipped with a hydraulic power system and carbon filtration. Test results show more than 95% capture and containment of gases and liquids. Uprighted cans are automatically fed into a pre-loader for crushing in a hermetically sealed compaction cylinder. Contents are sent to a storage tank where gases are either filtered, incinerated or recycled. Compacted cans can be recycled. The EVAC Jr. processes 300 cans per hour. Call for more details!
