NEW E-Commerce Disc Top Cap
Kaufman Container is excited to introduce the FIRST disc top cap with a built-in locking mechanism. The twist to lock ring secures the actuator in place and prevents accidental opening during transport. Designed by Aptar, this 24-410 disc top cap eliminates the need for shrink bands and other add-ons typically used for e-commerce. Avoid the Amazon chargebacks by converting to this e-commerce disc top cap today!

Aerosol Can Crusher with Automatic Feed and Recycling Option from Beacon
Beacon Engineering offers an affordable can crusher with automatic feeding AND a new labor saving feature that allows for preloading the feed table with up to 16 cases of cans. This compact machine is equipped with a hydraulic power system and carbon filtration. Test results show more than 95% capture and containment of gases and liquids. Uprighted cans are automatically fed into a pre-loader for crushing in a hermetically sealed compaction cylinder. Contents are sent to a storage tank where gases are either filtered, incinerated or recycled. Compacted cans can be recycled. The EVAC Jr. processes 300 cans per hour. Call for more details!

Make More Magic Website Relaunched
CAPCO’s Make More Magic website provides an improved digital hub for key stakeholders in the industry, to foster community and to better educate consumers on the uses, environmental impacts and safety of aerosol products. With the perception of aerosols often clouded by dated information and misconceptions, Make More Magic encourages manufacturers, consumer brands, scientists and other principals in the industry to lead the way in demystifying concepts of aerosol products through creativity, activity and environmental education.
