Nouveau Actuators
Introducing the Summit Nouveau actuator family. This sleek, modern design allows for consistent branding across a family of products. Available in a configuration for every product: Foam, Gel, two-piece non-mechanical breakup for powder products, and two-piece mechanical breakup for traditional atomized sprays. Integrated cap available in transparent, translucent, and opaque colors. Bring a clean, consistent look to all of your aerosol products with the Summit Nouveau actuator family.

Summit BOV
Summit Packaging Systems now offers a new lower cost Bag-on-Valve System to the global market. Our continuing capital investment program in the aerosol valve business will make the BOV packaging option available to additional product categories as a result of more competitive pricing. Come visit our new state-of-the-art manufacturing facility exclusively producing BOV assemblies. Summit's investment in fully integrated manufacturing will assure that our customers will continue to receive the HIGHEST QUALITY, BEST SERVICE AND LOWEST PRICING that they have come to expect from Summit for the last 47 years.

Mounting Cups & Closures from Cap & Seal
Cap & Seal LP, member of the Euscher Group, offers mounting cups and other closures in plain and coated tin-plate, coated aluminum, laminate materials and stainless steel. Recently acquired capacity and a global knowledge base with local supplier values and service, are at your disposal.

Brad-Pak
Brad-Pak Enterprises, Inc. is a full service distributor of glass, plastic and aluminum containers, closures, pumps, and numerous other items that can be used to showcase your products. Also offered are decorating/frosting and package engineering services. With an extensive knowledge of the cosmetic, fragrance, chemical, aromatherapy and personal care markets, Brad-Pak can help you select the package that is right for your product or market niche.

New Foamers from Trivium Packaging
Trivium is the global leader in infinitely recyclable metal packaging. Trivium’s new advanced aluminum alloy foamer bottles are perfect for soap, skin, bath and shower products. Not only are the bottles 100% recyclable, but they are also refillable! A sustainable product for the exploding number of sustainability focused brands and consumers.

Aerosol & BOV Filling Systems
Since 1965 Terco has developed a broad range of industrial, personal care, sanitary and food grade filling systems to complement any filling package. From conventional aerosol laboratory equipment to high-speed continuous motion rotary turnkey Bag-On-Valve filling lines, Terco continues to be a leader in the aerosol industry. With customers in over 50 countries, our experience and quality stands testament to our commitment in providing the best solution for all your filling needs.
Stand Out from the Crowd with Aerosol Cans by LINHARDT®
LINHARDT® is a technology leader in impact extrusion of aluminum tubes and cans. Our award-winning grooved cans enable the haptic decoration of aluminum cans with axial and parallel grooves. As decoration becomes increasingly important we have developed HD4Alu – a technology that allows photorealistic printing on aluminum cans. With these innovative packaging solutions your product attracts the attention it deserves.

Aluminum Aerosol Cans from Montebello
Montebello provides the perfect package to enhance your trusted brand. Offering sustainable aluminum aerosol cans in 25, 32, 35, 38, 45, 53, 58, and 66mm diameters. Strategically located manufacturing locations in both the U.S. and Canada. Our decorating capabilities are highlighted by 9-color printing, proprietary dry dot screening, and color separation techniques which allow us to push the limits of dry offset printing. Vision inspection systems and statistical process control for all of our manufacturing operations ensure print consistency and quality of every package.

*Also offering aluminum and laminate tubes.

Aerosol Can Crusher with Automatic Feed and Recycling Option from Beacon
Beacon Engineering offers an affordable can crusher with automatic feeding AND a new labor saving feature that allows for preloading the feed table with up to 16 cases of cans. This compact machine is equipped with a hydraulic power system and carbon filtration. Test results show more than 95% capture and containment of gases and liquids. Upright cans are automatically fed into a pre-loader for crushing in a hermetically sealed compaction cylinder. Contents are sent to a storage tank where gases are either filtered, incinerated or recycled. Compacted cans can be recycled. The EVAC Jr. processes 300 cans per hour. Call for more details!

**360° Embossed Shaping with Oriented Printing Technology**

ARYUM, a leading aluminium aerosol can manufacturer, developed a unique technology in 2015 called “360° Embossed Shaping with Oriented Printing”. Compared to the traditional standard shapes, our technology gives a unique shaped deformation around the circumference of the can, this enables a special 360° deformed & printed area apart from the flat surface of the can where you can highlight your brand or logo. Our facility has a production capacity of 90 million aluminium cans per year with 4 production lines. We provide cans with a wide range of shapes in 35, 45, 50 and 53Ø.
