

Thai aerosol industry bands together

Slight increase in 2019 underscored by altruistic efforts

The Thai Aerosol Association (TAA) reported that total aerosol production in 2019 was approximately 301 million cans. This was an increase of just 0.33 % over 2018.

There were 174 million tinplate steel cans filled in 2019, as well as 127 million aluminum aerosol cans filled. Aluminum

can fillings increased 13% while steel can fillings decreased 7%.

Six categories were represented; the TAA indicated that the Food category represented 0% of fillings and was therefore not included in its 2019 statistics.

In April of 2020, the TAA filled and donated 50,000 units of TAA Alcohol Spray to government agencies and hospitals in order to help combat COVID-19.

According to TAA Secretary Pornsak Tangprapa, the TAA was able to launch the products in just three weeks at a total cost of 2.2 million baht (\$69,561).

The endeavor was 50% funded by seven core TAA members, including Alucon, Cyberpax, Mitani, Precision Valve, Swan Industries, Thai Daizo Aerosol and Toyo Filling International. The other 50% was supplied from a special TAA fund. **SPRAY**

Thailand Aerosol Production 2019

(in millions of units)

Year	Steel	Aluminum
2007	88	66
2008	100	90
2009	105	67.6
2010	125	63.1
2011	105	107
2012	102.5	131.3
2013	102	139
2014	119.8	133.1
2015	120	147
2016	140	149
2017	160	139.6
2018	187.24	112.74
2019	173.85	127.05
