

German aerosol production in 2021...

According to German aerosol association Die Industrie-Gemeinschaft Aerosole e.V. (IGA), there were 1.001 billion aerosol cans filled in Germany in 2021, compared to 1.040 billion in 2020, for a decrease of 3.75%. Categories were broken down

into aluminum and steel containers; IGA indicated that aerosol products filled in glass and plastic containers represent such small numbers

that they can't be reported in detail.

Production of aerosols in the largest market segment, Personal Care, totaled 600 million units in 2021, with the largest subcategory, Deodorants/Antiperspirants, accounting for more than half (372 million). The second largest subcategory, Hair Sprays, numbered 134 million.

Paints & Varnishes (including Automotive) was the second largest category, with 106 million units, edging out Industrial & Technical in third place at 96 million units. Miscellaneous (which now includes Food Products) ranked fourth with 80 million.

The Household category saw 46 million units produced in 2021, followed by Automotive (44 million) and Pharmaceutical & Veterinary (29 million). **SPRAY**

Germany 2021 Aerosol Fillings

Figures in '000 units	PRODUCTION Aluminum cans	PRODUCTION Steel cans	TOTAL PRODUCTION
