

## Mexican aerosol production

IMAAC reports growth across most categories in 2022...

Aerosol production in Mexico saw a 2.57% gain in 2022 over the previous year, according to data from Instituto Mexicano Del Aerosol, A.C. (Mexican Aerosol Institute or IMAAC). A growth trend in the country over the past several years continued, with 726.3 million units produced in 2022, compared to 708.1 million units in 2021.

The Personal Care category held the largest share of 2022 fillings at 65%, increasing 8.94% from the previous year to 472.1 million units. Industrial/Automotive products grew 4.89% to 32.36 million units filled, while Insecticides had a small increase (1.24%) in 2022 to 104.83 million units. Paints rose 4.76% to 47.57 million units filled. The Food Aerosols category, which had been introduced to the market in 2021, made an impressive leap of 8.55% with 9.14 million units filled.

Other products saw the largest gain at 82.56%, with 11.83 million units filled. Household Care products, however, fell significantly (33.21%), with 48.47 million units filled in 2022 versus 72.58 million units the year before; IMAAC had no updates to the Pharmaceutical category. **SPRAY**

Swiss Aerosol Solutions

## Aerosol Know-How Machines for Aerosol and Spray Systems

**For 55 years, we have been producing everything ourselves in the Swiss town of Pfäffikon.**

Pamasol offers first-class Swiss workmanship, for we produce nearly everything ourselves in high-quality production facilities in Pfäffikon, from crimp heads to name plates. From electrical controllers to all of the software. From manual machines to high capacity systems capable of producing up to 600 cans per minute. The constant pursuit of quality Swiss work has made us a technology leader. The result is precise and economical systems that will last for many years.
