Latin American aerosol production

Federación Latinoamericana del Aerosol (Latin American Aerosol Federation or FLADA) has released filling statistics for 2023, 2024 and projections for 2025.

With 212 million inhabitants, Brazil has an annual per capita consumption of 6.6 aerosol products. In 2023, Brazil produced 1.3 billion units; in 2024, it produced 1.34 billion units. Projected growth for 2025 is ±5%.

Argentina has 46 million inhabitants and its annual consumption per capita is 14.5 aerosol products. In 2023, Argentina produced 863 million units; in 2024, it produced 908 million units. Projected growth in 2025 is ±4%.

Mexico has 138.5 million inhabitants and its annual consumption per capita is 3.9 aerosol products. In 2023, Mexico produced 786 million units. In 2024, the country produced 838 million units and exported 280 million units. Projected growth for 2025 is ±4%.

Chile has 19.76 million inhabitants and its annual consumption per capita is 4.2 aerosol products. In 2023, Chile produced 15.3 million units; in 2024, it produced 10.7 million units. Chile's annual consumption of aerosol products is 81.33 million units. SPRAY
